

Air Care is a constantly evolving and exciting sector. It is about more than just removing odours; the way a shop, office, washroom or hotel smells is now seen as part of the signature brand experience.

Our new fragrances, introduced at ISSA Interclean 2014, follow the most recent trends in fine and home fragrance. They are scents that are both familiar and recognisable but also a little different to create impact and interest. [Ask about our products, prices and fragrance samples](#)
